“Always strive to help people everywhere achieve better health and enhance their quality-of-life”

Delivering on SUNSTAR's promise of better health and better life

SUNSTAR believes that the state of one's oral health has a deep connection to the health of the whole body. We have pioneered this idea and continue to champion it in partnership with dental and medical specialists throughout the world. Recent research has highlighted probable links between oral health and serious health conditions such as heart disease, diabetes and complications during pregnancy. Along with SUNSTAR's other major oral brands, GUM® delivers on this mission by sustaining mindful, enjoyable oral care rituals for truly holistic health.

GUM oral care rituals celebrate everyday health

Along the way, with our integration into the SUNSTAR group, we have come to embrace a holistic view of oral health. We see oral health not just as an end in itself, but as one of the foundations of a healthy body. SUNSTAR research has shown that mouth and body health are closely linked - just like our diet can affect our heart health, our mouth health can affect our cardiovascular and metabolic health. Today, the GUM brand is committed to helping people at all stages of life, improve their holistic health and well-being, one mouth at a time.

A family dedicated to the promotion of holistic healthcare

SUNSTAR's mission to improve the global health and well-being of its consumers is rooted in the story of the Kaneda family.

It all started when Kunio Kaneda, the company's founder, lost his battle with diabetes. Following his death, his son, Hiroo Kaneda, fulfilled his wish of improving public awareness and prevention of diabetes and its complications.

Diagnosed with diabetes and periodontal disease a few years later himself, Hiroo could sense that both diseases were linked somehow.

It wasn't until Dr. Matsumura, founder of the Osaka University School of Dentistry, suggested this link to Hiroo, that he decided to initiate and support research into the relationship between both diseases.

A company, anchored in engineering, propelled by ingenuity and dedicated to consumer well-being

For over 90 years SUNSTAR has been a global pioneer in 360° well-being and helping people everywhere lead better lives.

Founded in 1932 in Osaka, Japan, by Kunio Kaneda, its origins rooted in the production of bicycle glue. However, SUNSTAR's passion for innovation and engineering quickly propelled the company into new territories.

In 1946, SUNSTAR entered the Oral Care industry, with innovative toothpaste in a tube, in a market dominated by powdered toothpaste. Oral care soon became SUNSTAR's core business, coupling its passion for innovation with consumer health.

SUNSTAR's research initiatives seek to expand the company's knowledge in different areas to develop innovative, evidence-based solutions that have a strong impact on people's lives.

Using an open approach to innovation, SUNSTAR has collaborated on joint research projects with world-famous institutions, including: SUNY Buffalo University, Acta, Joslin diabetes Centre, the Shizuoka Cancer Centre, Complutense University of Madrid and Gothenburg University.

SUNSTAR's researchers are on the forefront of innovation, developing cutting-edge solutions in biotechnology, nanotechnology, polymer chemistry and metal working.

The company's research efforts span across 3 key areas: Mouth & Body, Health & Beauty and Safety & Environment. This strategy supports SUNSTAR's mission to improve total well-being with a holistic 360° approach.

Sunstar Group Long-Term Vision 2032

Sunstar is a company that contributes to enhancing healthy life expectancy and quality of life (QOL), starting from good oral health to preventive medicine and holistic wellness. It is important for us to be recognized as the most trustworthy company in the world, providing total support for people to live a healthy and comfortable life in all living environments including mobility and buildings.

We will contribute to solving social issues through businesses that are aimed at our Ideal Image in 2032. At the same time, we will work on environmental initiatives, enhancement of employee happiness, and improvement of the management platform as priorities required by society, and in partnership with our stakeholders, we will create new values for the wellbeing of people and the planet.

Sustainability

The Sunstar Group celebrated its 90th anniversary in 2022. Looking back on our history, it has been a constant series of challenges to develop our business from new perspectives.

As we look toward our 100th anniversary in 10 years, we will strive for ESG-driven management to fulfill our corporate social responsibility of becoming a company that contributes to the happiness of all people involved with Sunstar and the planet.

We will take on the challenge of new innovations to solve social issues by integrating the advantages of both our consumer and industrial businesses while passing on Sunstar's DNA to the next generation.

Sunstar has reduced global CO² emissions by 22%, increased by 53% the FSC paper used in all packaging, and raised to 73% the ratio of recyclable materials used for post-consumers packages and containers, among others.

Our **world**

GUM is dedicated to serving people who want to take exceptionally good care of their teeth and gums. For people from all walks of life, who are **PROUD TO CARE** for their health.

We care **holistically**

We are passionate about oral health because we know it is the gateway to our body health. Mouth and body health are connected in unexpected ways - just like a poor diet can affect sleep and mood, our mouth health can have repercussions on our cardiovascular health as well as our metabolic health. Holistic mouth care is an important foundation of a healthy body and we pledge to deliver it, with the greatest attention to detail, every day.

We believe in **RITUALS**

Just like you, we believe that everyday tiny actions can bring about big changes in life. Our rituals do just that. A natural extension of any self-care routine, our rituals are made of easy gestures that allow us to gently and effectively clean our whole mouth, including where a toothbrush can't. Our rituals leave us feeling delightfully fresh and clean and are good for mouth and body.

We care for the **SMALL** to care for the **BIG**

Because we see our body as one big interconnected system, we are keenly aware that little things can bring about big changes. We are committed to helping everyone take complete care of their gums and teeth, including the tiny spaces between teeth or along the gum line - where most conventional toothbrushes cannot reach. We know keeping these spaces clean is essential for our gum health and even our body health. Their wellbeing will help prevent a butterfly effect - a chain of events that could test your mouth and body health.

We care with attention to **DETAIL**

Our ambition - to clean where most conventional toothbrushes don't - requires a zest for detail and perfection. And lots of ingenuity - our toothbrushes, interdental brushes, toothpastes and mouthwashes are skillfully designed to reach more areas of our mouth and deliver a full mouth clean. They are created to do so with ease - we believe thoroughness should be within everyone's reach.

We are keen to **DELIGHT**

The good things in life not only do good, but also feel good. We are devoted to injecting delight into oral care and to making every gesture, every ritual, an enjoyable, feel good moment.

Our oral care rituals celebrate everyday health. They offer more complete self-care than brushing alone. Built around 3 easy steps, they allow to gently and effectively clean our whole mouth, including the tiny spaces between teeth and along the gum line, which play an important role in our oral wellbeing and are the source of many oral health challenges.

1. Gently and effectively cleaning where a toothbrush alone can't, using a gentle interdental brush

Eliminating small food particles and bacteria hiding between teeth to achieve an extra deep clean and keep our mouth feeling extra fresh and clean throughout the day. A super easy and feel-good step that is essential to help prevent gum inflammation and its far-reaching effects on our mouth and body health.

2. Brushing to keep teeth looking and feeling healthy, clean and radiant

Eliminating food residue and plaque to keep our teeth feeling smooth and our breath feeling fresh throughout the day. Using a toothbrush with soft, tapered bristles to clean below the gum line where the plaque accumulates. Combining this with one of our gentle toothpastes that help fight plaque and fortify teeth and gums.

3. Rinsing with a gentle mouthwash to strengthen our teeth and gums, prolonging the effects of good brushing

Ending our oral care ritual with the fortifying effects of a mouthwash - good for our teeth and gums. Mouthwash easily spreads inside our mouth, covering all nooks and crannies. Opting for a mouthwash with an anti-plaque action and fluoride to fortify our teeth. Looking out for mouthwashes with soothing natural ingredients for our gums. Finally, favouring a formulation that is gentle and alcohol-free that will not disrupt our natural mouth flora and making sure to rinse at least one a day after brushing.

These rituals can be practised as part of our self-care. GUM wide range of solutions, developed with oral care experts, addresses all kinds of different oral care needs. Discover our products and choose the ones that are right to create personalised oral care rituals.

ADVANCED GUM CARE

Gum diseases are inflammatory diseases of the gums, resulting from an accumulation of bacterial dental plaque that accumulates and mineralizes, turning, on the long-term, into tartar, attacking teeth, interdental spaces and gums.

There are 2 types of gum disease. When it is limited to gums only, we speak of gingivitis. When it affects the entire periodontium (set of tissues that surround and support the tooth), it is called periodontitis, which can result in loosening and loss of teeth if left untreated.

It is reported that 6 out of 10 people are affected by some kind of periodontal disease according to the W.H.O. (Global Oral Health Data Bank. Geneva: WHO, 2002).

Prevention begins at home through maintenance of basic oral hygiene, such as toothbrushing, mouthrinsing and flossing. Advanced Gum Care product range was specially developed for people concerned by gum diseases or requiring a more important control of their gums health, and allows to take care of the oral health in a deeper and more focused way.

When at-home prevention alone is not enough, dental scaling and prophylaxis is carried out. Professional prophylaxis is recommended once every 6 months.

GUM PAROEX - Dual Action Antiplaque System

The combination of Chlorhexidine Digluconate (CHX), professional reference for plaque control and Cetylpyridinium Chloride (CPC), has the long-lasting ability to attack the structure of existing plaque and prevent the growth of bacteria and toxins responsible for its formation

Maintenance: 0.06% CHX + 0.05% CPC Toothpaste and Mouthwash

Ideal in the maintenance phase after a periodontal treatment or to address the early signs of sensitive gums. Also recommended for plaque control in orthodontic, implant, denture or other prosthetic situations.

- Helps reduce dental plaque accumulation
- Helps soothe sensitive gums
- Helps maintain gum tissues in a healthy condition
- Alcohol-free formula with pleasant taste
- Contain Vitamin E, an effective antioxidant that helps neutralize the free radicals that attack gum tissue cells
- The toothpastes contain Aloe Vera, to help nourish and soothe irritated mouth tissues, and Pro-vitamin B5, a tonic agent, to help revitalize oral mucosa
- GUM PAROEX 0.06% toothpaste helps prevent cavities and remineralise enamel with Fluoride (1'450 ppm)

Intensive Action: 0.12% CHX + 0.05% CPC Toothpaste and Mouthwash

Ideal in pre- and post- oral surgery, tooth extraction and implant placement.

Advanced Gum Care

Triangular bristles

innovative triangular filaments

CHX- or silver-zinc ions-coated bristles

Non slip ridges for a better grip

Non-slip flexible handle for maximum comfort

10 sizes available from 0.6 to 2.6mm

10 sizes to fit all types of interdental spaces

Cleans up to 40% more tooth surface vs. toothbrushing alone

GUM TRAV-LER

- Reusable interdental brush that can be used anywhere and anytime thanks to its practical compact format
- Proven efficacy: removes up to 25% more plaque thanks to its innovative triangular filament (compared to regular nylon filaments)
- Gently and effectively removes food and plaque between teeth, where a toothbrush can't
- Greater comfort and protection of the gums thanks to the rounded tip and coated wire
- Ergonomic, non-slip handle for maximum comfort and control, with a bendable neck to easily reach back teeth
- Bristles are coated with Chlorhexidine (for ISO 0 to ISO 6) and silver-zinc ions (for ISO 7)
- Available in 10 different sizes to fit all types of interdental spaces

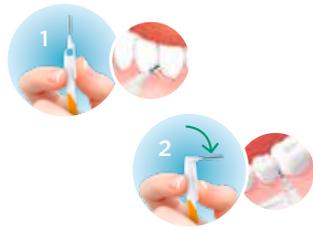

NO: 1312		GUM TRAV-LER Cylindrical	0.6 mm/ISO size 0	6 pcs/36 pcs

NO: 2714		GUM BI-DIRECTION (Tapered)	1.4 mm/ISO size 4	6/36 pcs

NEW

GUM INTERDENTAL SIZE INDICATOR

- Smart, simple tool designed to support professionals in selecting the right interdental brush size for their patient.
- 5 colour-coded segments calibrated to match the sizes of five main GUM TRAV-LER brushes.
- Soon compatible also with GUM BI-DIRECTION.
- Supports better patient outcomes by simplifying size selection and improving interdental cleaning compliance.

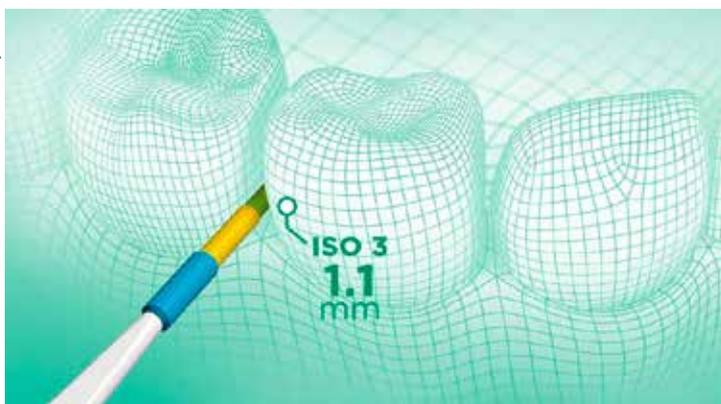

The colour you see is the brush your patient needs

- For brushes sizes ISO 1 to ISO 5, match the colour shown on the GUM Interdental Size Indicator to the GUM TRAV-LER and GUM BI-DIRECTION brush colour.
- If the GUM Interdental Size Indicator doesn't fit, recommend ISO 0 size.
- For larger gaps (ISO 6+), fit brushes directly.

How it works

Insert gently into the interdental space. Do not force. Observe the visible color at the gum line - this indicates the correct size. Match the colour to the GUM TRAV-LER and GUM BI-DIRECTION brush.

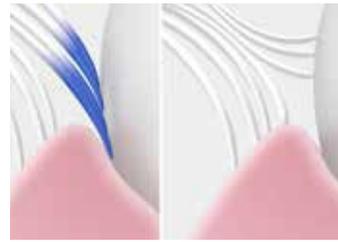

Intuitive grip at 45° degrees

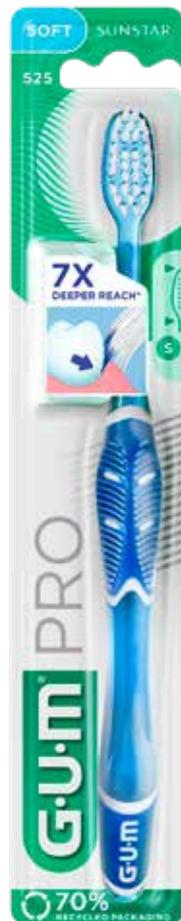

Thin-tipped bristles

Reaches deeper under the gum line

Reaches deeper in-between teeth

GUM PRO Toothbrush

- Deep cleaning of teeth and gums for superior everyday care¹
- Ultra-thin tip bristles reach 7 times deeper under the gumline* and expertly make their way around the teeth
- A configuration of bi-level bristles designed to expertly make their way below the gumline and around your teeth.
- Ergonomic anti-slip grip handle, naturally positioning the hand at 45° degrees for optimal brushing results
- Exist in soft and medium bristles, in compact and regular head sizes
- Protective cap for optimal hygiene while on-the-go
- Available in 4 colors

NO: 525	GUM PRO	Compact	Soft
NO: 526	GUM PRO	Regular	Medium
NO: 528	GUM PRO	Compact	Medium

GUM TWISTED FLOSS

- Deeper plaque removal (vs a single strand floss)
- Unique refreshing green mint tea flavor makes flossing a feel good moment and helps to establish good habits
- Two twisted strings offer 30% more floss surface
- Waxed for easy glide
- Fresh flavor of mint and green tea

GUM BUTLERWEAVE® FLOSS

- Patented “woven” design: spreads out on tooth surface to clean and remove plaque effectively
- Wide, flat profile: glides between tight contacts
- Container with rewindable wheel to prevent wasting floss
- Exist in mint and non mint versions

NO: 3500
NO: 1155
NO: 1855

55 m

GUM ACCESS FLOSS

- Interproximal cleaning floss features an extra-thick spongy brush section, specifically designed to facilitate an effective cleaning around implants, under bridgework and between extra-wide interdental spaces
- An ultra-stiff threader on each end of the brush helps thread the product without the need for a separate floss threader
- Recommended by dentists for cleaning and maintenance of dental work and periodontal care

Pre-expand

Post-expand

GUM EXPANDING FLOSS

- Thin and easy to insert even between the tightest contacts
- Expands during the use, allowing the floss to adapt to varying sizes of interdental spaces for a better surface contact
- Gentle on gingival tissue, perfect for sensitive teeth and gums

DAILY CARE

Our mouth contains millions of bacteria. The lack of regular and appropriate oral hygiene causes the build-up of dental plaque, which, on the long term and through the process of tartar formation, leads to the gums inflammation - gingivitis.

Tips for a complete oral hygiene:

- Interdental spaces, difficult to access with the toothbrush, are the location where plaque tends to accumulate. **Dental floss or interdental brushes** allow to effectively eliminate the plaque.
- **Brushing the teeth** for 2-3 minutes after each meal, or at least twice a day, is recommended to mechanically remove the plaque and food particles present on teeth and gums surface.
- **Fluoride and anti-plaque toothpaste** helps remineralize enamel for stronger teeth and eliminates harmful bacteria for a healthy mouth.
- In addition, the use of **a mouthwash with an anti-plaque action**, after each brushing, allows to reach the inaccessible for the toothbrush locations, and to extend the anti-plaque effect.

Q₁₀

GUM ActiVital Toothpaste

- Multi-functional product designed to promote the health of teeth and gums for life
- Contains coenzyme Q₁₀ and pomegranate, well-known antioxidants
- Provides a long-lasting prevention against plaque formation and dental caries thanks to:
 - The innovative anti-plaque system PlakClear™, that absorbs bacteria from plaque
 - Combination of Fluoride (1'450 ppm) and Isomalt helps to remineralize enamel and protect against cavities
- Strengthens gums and teeth thanks to ginger and Bisabolol
- Gentle formula
- Fresh peppermint flavor

GUM ActiVital Mouthwash

- Multi-functional product designed to promote the health of teeth and gums for life
- Contains coenzyme Q₁₀ and pomegranate, well-known antioxidants
- Provides a long-lasting prevention against plaque formation and dental caries thanks to:
 - The anti-plaque system, LAE (Ethyl Lauroyl Arginate), which forms a protective film that prevents microorganisms from adhering back to the teeth surface
 - Combination of Fluoride (248 ppm) and Isomalt helps to remineralize enamel and protect against cavities
- Strengthens gums and teeth thanks to ginger and Bisabolol
- Gentle formula
- Alcohol-free
- Fresh peppermint flavor

Implants, bridges or crowns

Orthodontic appliances

YOUR PARTNER FOR COMPLETE SELF-CARE: HELPS YOU CLEAN WHERE YOUR TOOTHBRUSH ALONE CANNOT, BETWEEN TEETH AND BELOW THE GUM LINE WHERE PLAQUE AND FOOD TEND TO ACCUMULATE.

Gentle on gums

Our soft rubber picks massage gums and clean between teeth without abrasion. They are latex-free and safe even for sensitive and/allergic patients

More motivation

Less demanding methods of interdental cleaning increase patient motivation, compliance and outcomes (Needleman, 2005; Wilder, 2016)

GUM SOFT-PICKS PRO

New generation interdental tool inspired by an interdental brush:

- Ultra soft and exceptionally easy to use
- +50% superior cleaning*: it's head has been redesigned, now with 152 gentle bristles for superior cleaning.
- Ergonomic handle for easy access of back teeth
- Easy to insert and slide between teeth
- Available in 3 sizes: S, M, L
- Travel case included (30 pcs)

NO 689	SOFT-PICKS PRO Small	30/60 pcs
NO 690	SOFT-PICKS PRO Medium	30/60 pcs
NO 691	SOFT-PICKS PRO Large	30/60 pcs

*Compared to GUM SOFT-PICKS ADVANCED

GUM SOFT-PICKS MINTY

The flavor-packed rubber pick that delights you with a burst of cool mint, before brushing or on-the-go

- Soft and flexible rubber bristles with pleasant scent of fresh mint that glide comfortably between teeth to remove plaque and food debris
- Comfort & control: Wider bendable handle for an easy grip and maneuverability in all areas of the mouth.
- Ideal after every meal, leaves you feeling confident, fresh and clean
- So gentle, it massages your gums. No latex, no wood, no metal
- Includes practical travel case (with 40 pcs)

NO 669	SOFT-PICKS MINTY Small	40 pcs
NO 670	SOFT-PICKS MINTY Medium	40 pcs
NO 671	SOFT-PICKS MINTY Large	40 pcs

ORAL CARE ON-THE-GO

Folds into a convenient travel size

Integrated tongue cleaner

Convenient pouch included

Perfect for on-the-go usage

GUM TRAVEL Toothbrush

- Foldable toothbrush designed to keep mouth clean and fresh while on-the-go
- Regular size toothbrush easily folds into a compact, convenient for travel size
- Soft bristles for gentle cleaning
- With tongue cleaner on the toothbrush head that helps provide fresh breath
- Ventilation holes in the handle
- Available in 4 colors (red, purple, blue and green)

GUM TRAVEL KIT

- Convenient kit designed to keep your mouth fresh and clean while on-the-go. Contains the following products:
- GUM TRAVEL manual toothbrush
- GUM ORIGINAL White Floss
- GUM ORIGINAL White travel size toothpaste
- GUM SOFT-PICKS MINTY rubber interdental picks

ANTI-STAIN

The loss of whiteness or the appearance of stains on the teeth surface often originate in our daily habits. There are 2 types of stains:

External stains: located on the surface of the tooth, they can be caused by tartar, the consumption of certain foods and beverages (coffee, tea, red wine and sodas) but also by smoking. These stains are linked to colored molecules that attach to the surface of the enamel.

Internal stains: these stains lie below the surface of the tooth, on the part called dentine. They may be due to age, excessive use of fluoride or certain types of drugs. The treatment of internal stains is done by the dentist, thanks to whitening gels.

NEW FORMULA

GUM Original White Toothpaste

- Proven to remove up to 97% of surface stains and restores the teeth’s natural whiteness.
- New formula with reduced abrasiveness and gentle on enamel
- 24-hour protection against surface stains
- Combination of Fluoride (1450 ppm) and isomalt provides enhanced remineralisation of tooth enamel
- Enriched with Vitamin E and Pro-vitamin B5
- Comes in recyclable packaging

GUM Original White Toothbrush

- For naturally white teeth, every day
- Soft bristles with square geometry gently and effectively remove stains
- Elegant design. Handle with thumb pad for good grip
- Protective cap for optimal hygiene while on-the-go
- Available in 4 colors (white, pink, light blue and dark blue)
- Packaging made from 80% recycled paperboard and PET

GUM Original White Floss

- Designed to remove stains in-between teeth
- Removes stains between teeth, significantly more than other whitening flosses⁶
- Provides effective interdental and below-the-gumline plaque control
- With micronized silica and Fluoride

SENSITIVE TEETH

Approximately 1/3 of the world population suffers from sensitive teeth. If it is your case, there are several lines of actions.

Prevention begins at home through maintenance of basic oral hygiene and use of anti-sensitivity products specifically designed for patients suffering from sensitive teeth. GUM products for Sensitive teeth helps you to obtain a quick and long-lasting alleviation from sensitive teeth and to take care of your oral health by: preventing cavities and root caries and further damage to your enamel, effectively managing plaque and providing an extra gentle care to your sensitive teeth, oral tissue & oral flora.

When at-home prevention alone is not enough, the dentist may apply a varnish or coating on the tooth to immediately reduce the pain/sensitivity by occluding the dentinal tubules and/or prevent direct exposure to the pain-causing stimulants.

GUM SensiVital+ Toothpaste

- Contains an effective dual action formula that delivers quick and long-lasting alleviation from sensitive teeth:
 - Protects enamel and dentine: by plugging (with Hydroxyapatite particles) and sealing (with a Polymer) open dentine tubules, containing sensitive nerve endings,
 - Fortifies the tooth surface (enamel and exposed dentine) through enamel remineralization
 - Desensitize nerve endings (thanks to Potassium Nitrate)
- Protects against plaque with the anti-plaque system (CPC)
- Takes cares of your oral health:
 - With Fluoride (1'450 ppm), Isomalt and orange peel extracts to effectively help prevent cavities and root caries (a frequent corollary of receding gums)
 - Uniquely gentle with sensitive teeth and oral flora
- More than 70% of people who have used the toothpaste and the mouthwash report experiencing quick alleviation from tooth sensitivity, with a long term effect

NO: 6070

GUM SensiVital+ Toothpaste

75 ml

GUM SensiVital+ Mouthwash

- Provides an effective action that delivers quick and long-lasting alleviation from sensitive teeth:
 - Provides long-lasting alleviation of sensitive teeth (thanks to Potassium Nitrate)
 - Remineralizes enamel with Calcium and the combination of Fluoride (250 ppm) + Isomalt
 - Protects against plaque with an effective anti-plaque system (CPC)
- Uniquely gentle with sensitive teeth and oral flora
- More than 70% of people who have used the toothpaste and the mouthwash report experiencing quick alleviation from tooth sensitivity, with a long term effect

ORTHO CARE

Teenagers and adults undergoing orthodontic treatment are at higher risk of such oral problems, as an increased plaque build-up, white spot lesions, gingivitis and mouth ulcers. These issues can be avoided through prevention, which starts at home through maintenance of basic oral hygiene: toothbrushing, mouthrinsing and flossing, using wax to prevent ulcerations. At the end of the orthodontic treatment, the dentist usually carries out a professional prophylaxis.

Our GUM ORTHO line is designed to keep mouth clean and healthy while you are wearing a brace, retainer, or other orthodontic appliance. The range includes specially adapted brushing and flossing solutions, as well as protective wax to prevent irritations from uncomfortable brackets and wires.

GUM ORTHO Toothpaste

- Soothes gums and remineralizes enamel
- Specifically formulated for enhanced prevention of tooth decay and gum protection
- Contains Sodium Fluoride + Isomalt for strong enamel remineralization, which is crucial for prevention of white spot lesions
- Reduces plaque buildup thanks to Cetylpyridinium Chloride
- With aloe vera, ginger extract and Vitamin E
- Spearmint flavour for a fresh taste
- Contains 0.33% Sodium Fluoride (1490 ppm fluoride ion)

NO: 3080

GUM ORTHO Toothpaste

75 ml

GUM ORTHO Mouthwash

- Soothes gums and remineralizes enamel
- Higher Fluoride content (400 ppm) than regular mouthwash for superior remineralization action
- Antiplaque action thanks to the 0.05% Cetylpyridinium Chloride
- With aloe vera, ginger extract and Vitamin E
- Gentle spearmint flavor for pleasant fresh taste
- Gentle formula without alcohol that can dry the oral mucosa

NO: 3090

GUM ORTHO Mouthwash

CHILDREN ORAL CARE

Enamel provides a natural protection for teeth. However, children's milk teeth enamel is thin and more susceptible to decay.

Combined with the dietary (bad) children habits (higher and more frequent intake of sugary food) and the complications arising, due to the crowding of teeth owing to eruption of permanent teeth while the milk teeth are still present, children could suffer from multiple sites of dental decay.

Addressing children teeth decay:

- **First line of action:** Prevention begins at home by removal of plaque through regular (twice a day) maintenance of basic oral hygiene. Parents usually need to discipline children on the importance of regular oral hygiene.
- **Second line of action:** When at-home prevention alone is not enough, the dentist may remove the dental caries using the drill in the clinic and place a restoration to fill up the cavity. In some cases, children may suffer from rampant dental caries where a more extensive treatment may be required.

GUM KIDS Toothpaste (3+)

- Tailored to the specific requirements of milk teeth
- The combination of Fluoride and Isomalt provides twice the remineralisation of Fluoride alone
- Reduced Fluoride concentration (1000 ppm) specifically suited for children under 6 years old
- Very gentle formula for the best protection and care of milk teeth - a prerequisite for healthy permanent teeth
- **98% of ingredients of natural origin**
- Strawberry flavor
- Gel texture

NO: 3000

GUM KIDS Toothpaste (3+)

50ml

GUM JUNIOR Toothpaste (6+)

- Tailored to the specific requirements of the new permanent teeth
- The combination of Fluoride and Isomalt increases the enamel remineralisation for stronger permanent teeth
- Increased Fluoride level (1'450 ppm) for advanced cavities protection
- Very gentle formula to remove the risk of damage the still soft dental enamel of the new permanent teeth
- **98% of ingredients of natural origin**
- Strawberry flavor
- Gel texture

NO: 3004

GUM JUNIOR Toothpaste (6+)

Extra small head and soft bristles

Longer handle for parents hands

Soft bristles for gentle cleaning

Toothpaste amount indicator

GUM BABY Toothbrush (0-2)

- Helps build good oral care habits early
- Extra small head that fits easily into a baby's mouth
- Soft bristles for gentle cleaning
- Longer handle helps parents to keep a firm hold of the brush
- Available in 4 colors (yellow, blue, green and pink)

GUM KIDS Toothbrush (2-6)

- Age-adapted toothbrush head, covered with soft rubber to protect gums while brushing
- Soft dome-shaped bristles for gentle and efficient cleaning of their milk teeth
- Non-slip handle in just the right size for little hands
- Protective cap for optimal hygiene while on-the-go
- Central colored bristles show the correct amount of toothpaste to apply
- Free-standing design: a handy suction cup on the bottom of the handle make the brush stand upright to keep bristles clean
- Available in 4 colors (blue, pink, purple and green)

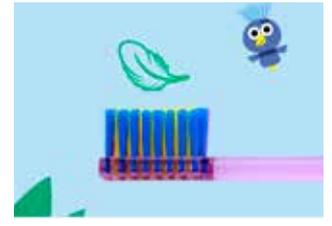

Free-standing design

Non-slip handle

Light timer

Soft dome-shaped bristles

GUM JUNIOR Toothbrush (6+)

- Age-adapted toothbrush head, covered with soft rubber to protect gums while brushing
- Soft dome-shaped bristles for gentle and efficient cleaning of their permanent teeth
- Easy-to-grip handle in just the right size for older children
- Free-standing design: a handy suction cup on the bottom of the handle make the brush stand upright to keep bristles clean
- Protective cap for optimal hygiene while on-the-go
- Available in 4 colours (yellow, pink, blue and green)

GUM LIGHT-UP Toothbrush (6+)

- Light timer flashes for 1 minute - children can simply brush their top teeth until the light stops flashing, then repeat for the bottom teeth
- Soft dome-shaped bristles for gentle and efficient cleaning of child's teeth
- Easy-to-grip handle, perfect for a child's hands
- Free-standing design: a handy suction cup on the bottom of the handle make the brush stand upright to keep bristles clean
- Available in 4 colours (purple, pink, green and blue)

GUM RED-COTE Tablets (7+)

- Plaque disclosing tablets
- Highlight harmful bacterial plaque on tooth surfaces and show the patient areas where more brushing and flossing are needed
- Cherry flavor

DRY MOUTH (XEROSTOMIA)

Dry mouth, also known as xerostomia, is believed to affect about 1 out of 4 adults and more than half of the elderly and is often overlooked. Many factors (stress, coffee or alcohol abuse), health conditions (diabetes, salivary gland disease), therapies (chemotherapy, radiation therapy) and some commonly used drugs can reduce saliva flow, causing dry mouth which can be uncomfortable, annoying and harmful to the oral health.

Severe dry mouth may lead to other oral healthcare problems, such as an increase in cavities and oral infections (gingivitis, gum inflammation, bad breath, etc.).

GUM HYDRAL range has been specifically developed to get immediate and long-lasting relief from dry mouth symptoms while protecting the mouth from damage due to dryness.

GUM HYDRAL Toothpaste

- Moisturizes dry mouth tissues
- A gentle toothpaste for daily oral hygiene of delicate oral cavity and dry mucosa
- Prevents cavities and promotes enamel remineralization thanks to Fluoride (1'450 ppm)
- To be used up to 3 times per day or after every meal

GUM HYDRAL Spray

- Moisturizes and soothes dry mouth tissues
- Immediate and long-lasting dry mouth relief
- Ideal for the on-the-go use thanks to its convenient small packaging
- To be used up to 10 times a day

GUM HYDRAL Gel

- Moisturizes and soothes dry mouth tissues
- Immediate and long-lasting dry mouth relief
- Its gel texture provides the relief needed to handle irritating and potentially damaging dry mouth
- To be applied on gums, tongue and oral mucosa, especially before going to bed and at night
- To be used up to 10 times per day

MOUTH ULCERS

Mouth ulcers are painful sores that appear on the tongue, gums, roof of the mouth, or inside the lips or cheeks. They are very common: it has been estimated that 20% of population will suffer from mouth ulcers at some time in their lives and the cumulative prevalence ranges from 5-66% of the population.

The mouth ulcer removes the top layer of the mouth's lining, so nerve cells become exposed. Food, drink, air and saliva can irritate these exposed nerve endings and cause even more pain and slow down the ulcer from healing. This is why ulcers can affect the patient's ability to concentrate, eat, drink and even speak normally. A barrier to protect the exposed nerve endings can help promote healing and offer immediate relief.

GUM AftaClear

- Provides an effective relief from the first application
- Offers a long-lasting and immediate pain relief
- Promotes fast healing
- Non-irritating and will not sting, burn, numb or dry mouth

GUM AftaClear Spray

- Ideal for specific site application and for the acute treatment and pain relief of canker sores, orthodontic abrasions, denture irritations, minor burns or other small lesions of the mouth
- Ideal to use on-the-go and for hard-to-reach areas, such as the back of the mouth.
- The easy-to-use and multidirectional pump guarantees a targeted application of the liquid with maximum hygiene
- Alcohol-free
- Suitable for adults and children (from 2 years old or 10+ kg, under adult supervision)

GUM AftaClear Gel

- Ideal for the acute treatment and pain relief of canker sores, orthodontic abrasions, denture irritations, minor burns or other small lesions of the mouth
- Mostly suitable in the acute treatment for local application on single lesions
- Easy-to-apply thanks to its long cannula
- Alcohol-free
- Suitable for adults and children (from 2 years old or 10+ kg, under adult supervision)

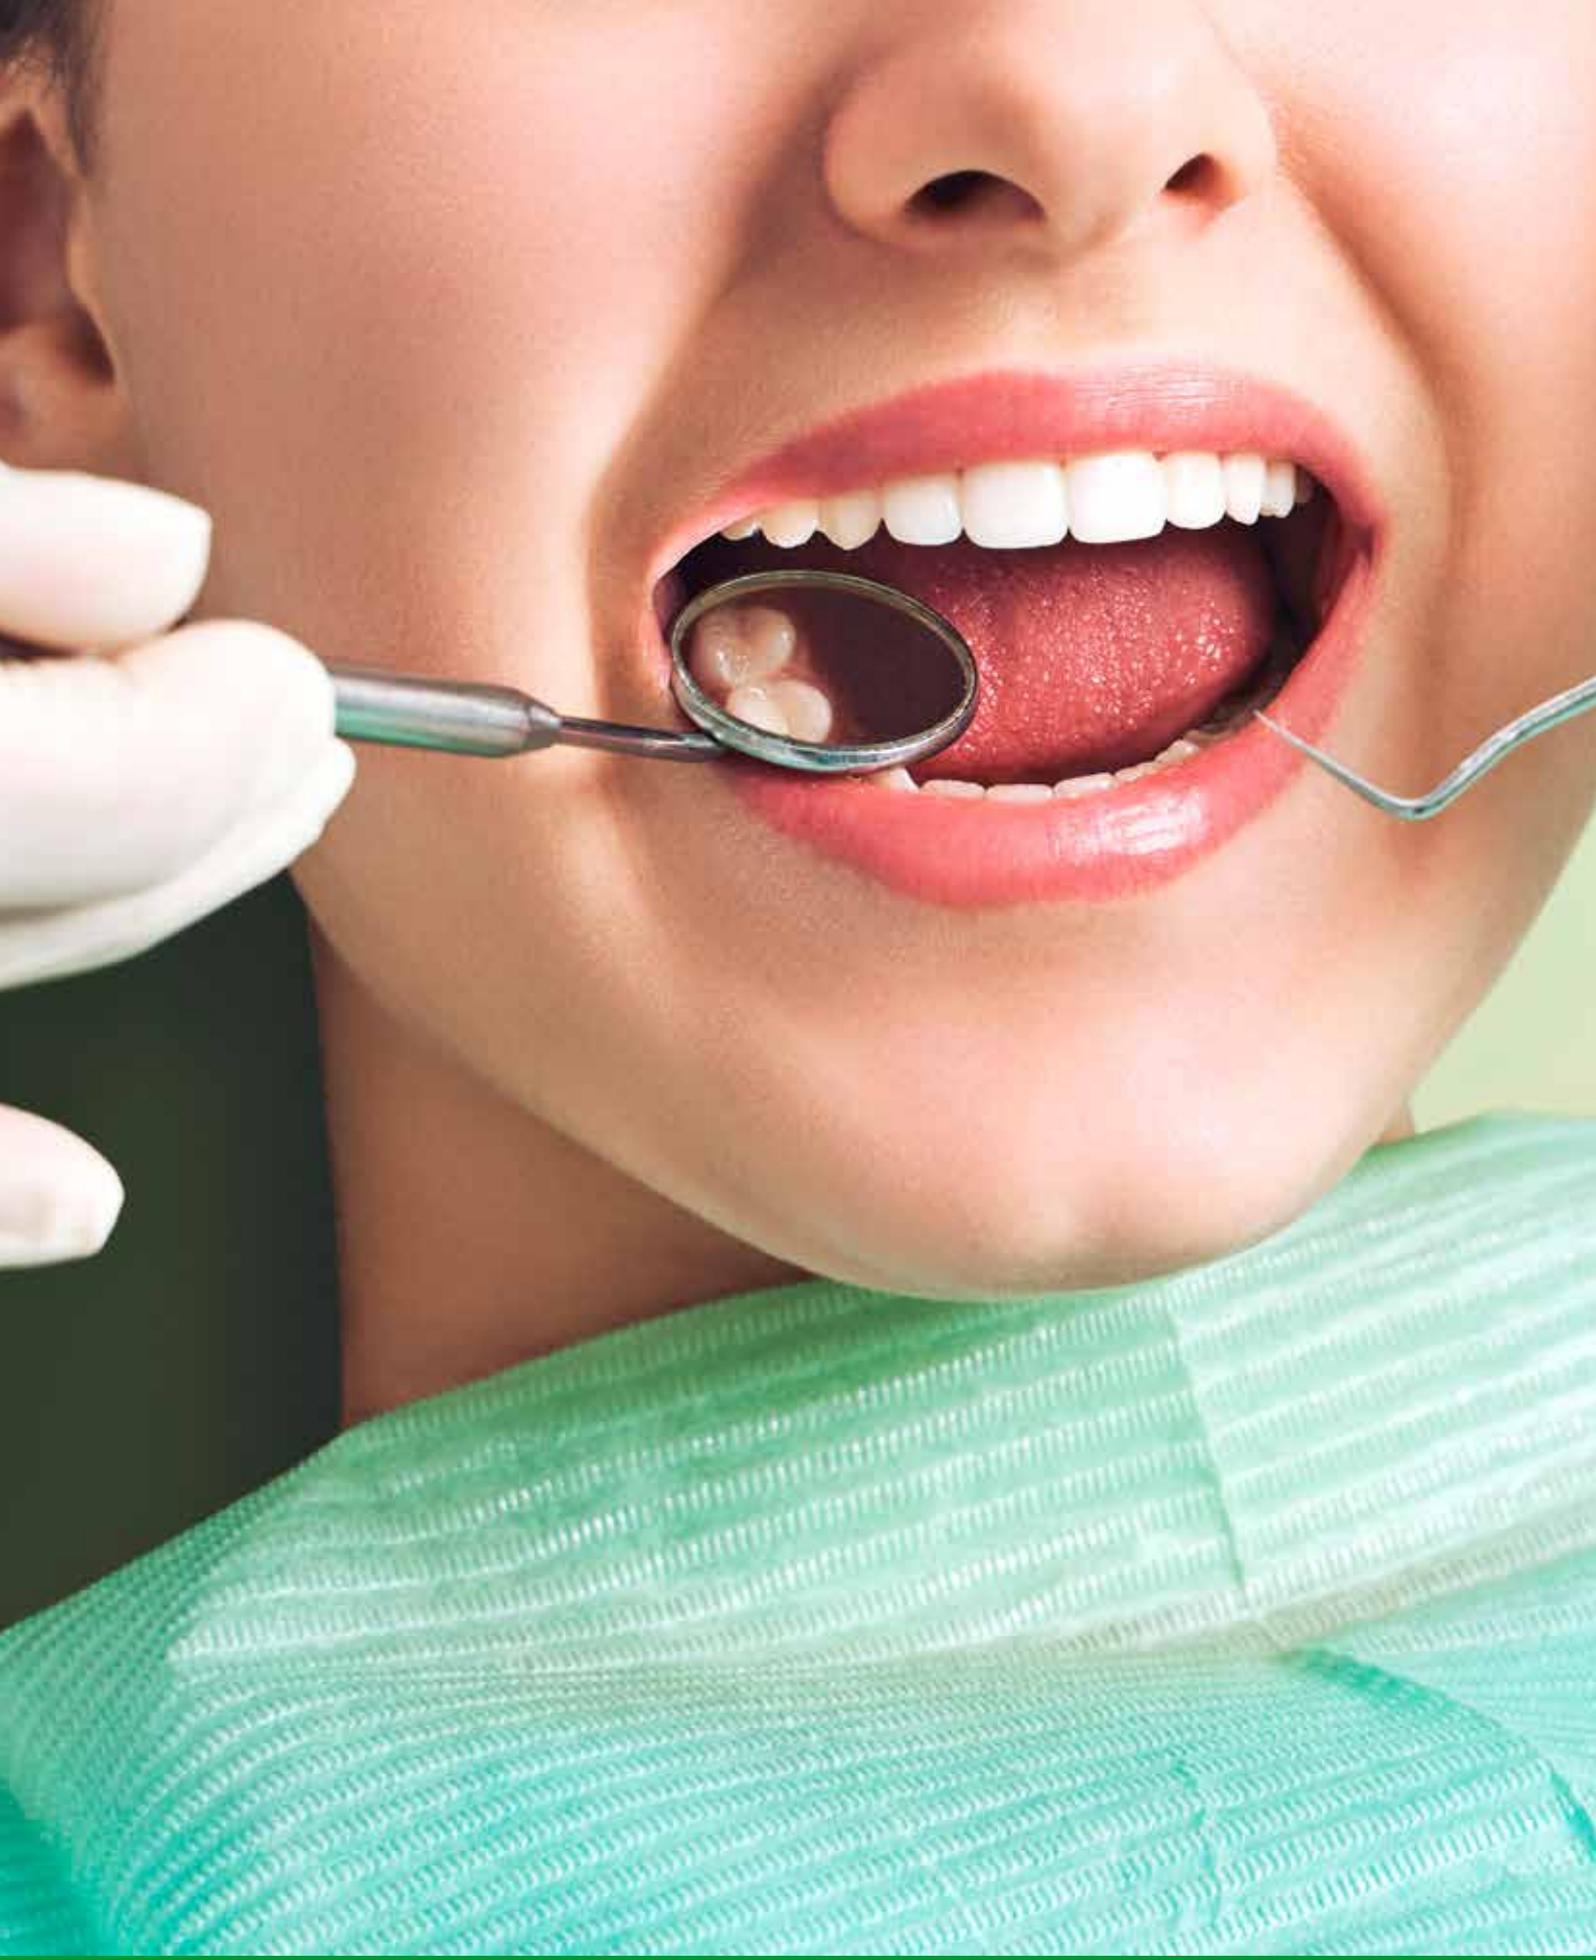

GUM AftaClear Mouthwash

- Ideal for prevention of progression and pain relief of canker sores or other lesions of the mouth
- Easy application helps to treat multiple, recurrent and hard-to-reach mouth ulcers
- Helps to prevent ulcers, sores and other mouth lesions from getting worse or spreading
- A convenient measuring cup for an easy application
- Alcohol-free
- Suitable for adults and children (from 6 years old, under adult supervision)
